About Us

First Steps Education day care centers offer child care for children 6 weeks to VPK. We have programs for Babies, Infants, Toddlers, Preschool & VPK.

First Steps Education provides child care in Port Richey where we strive everyday to making a child's day with us fun, caring, loving and educational. Here are a few services that we offer at First Steps Education Port Richey Center;

- We accept Early Learning Center School Readiness vouchers
- Provide a high learning VPK classroom
- Provide nutritious meals to all children with no additional cost
- Have a great educational program for children of all year groups from 6 weeks to VPK

First Steps Education Inc. was founded with a goal of providing a safe, clean, happy, caring and loving learning environment. With this common goal all staff at First Steps Education pride themselves in caring, loving and nurturing children through their early years and giving them the skills to enable them to flourish later in life whether those skills be academic or social skills.

First Steps Education Inc.

Babies Program (6 weeks to 1 year old)

The first year is the most developmental time in a child's life with many milestones from feeding to crawling to walking. We encourage children through the first year milestones by developmental activities from baby sign language which is a great way for children to communicate while learning to talk.

Infant's Program (Ages 1-2)

The focus of our infants program is learning through play. Our toddlers are offered a wealth of activities to explore their surroundings and the world through activities around motor skills and social skills with structured and unstructured play. Toddlers will engage in activities such as art, music, movement, story times, Spanish and more.

Toddler's Program (Ages 2-3)

The focus of our toddlers program is learning through play as well as meeting those all important milestones. Toddlers will engage in activities such as art, music, movement, story times, Spanish and more. Teachers use the Creative Curriculum when doing lesson plans. We use the scaffolding building blocks theory when teaching the concrete lessons and build on those to teach the more complex cognitive skills.

Preschool Program (Ages 3-4)

Our structured curriculum for preschool age children focuses on preparing children for VPK by developing phonics, letter recognition, sound recognition, number recognition and basic math concepts. Although our preschool curriculum has structured curriculum focus, children are encouraged to gain these recognitions and concepts through play. Teachers use the Creative Curriculum when doing lesson plans. We feedback to parents on a daily basis via daily report sheets which details what a child has learnt that day and activities they have engaged in.

VPK Program (AM or PM)

Our VPK program is free and prepares children for Kindergarten. Our VPK program focuses on reading, writing, basic math, Spanish, sign language, science, art, music and physical education giving children a rounded learning experience. In addition to the academic focus we also encourage children to develop further social skills through play. We also offer wrap around care before and after VPK at an additional charge. Teachers use the Creative Curriculum when doing lesson plans. We use the scaffolding building blocks theory when teaching the concrete lessons and build on those to teach the more complex cognitive skills.
